

# Committed to patient safety with minimal environmental impact

For over 20 years, we have developed patient monitoring solutions to help improve clinical care and patient safety. With headquarters in Sweden, products installed across the globe and solid funding, Senzime is a truly global company with a strong commitment to a safe, sustainable world for everyone.

## Pioneers in neuromuscular blockade monitoring

Backed by 40+ years of research and clinical care at leading US institutions including Yale, Mayo Clinic and Harvard, Senzime was the first company to launch a portable EMG-based neuromuscular monitor. To date, Senzime has installations at hundreds of leading hospitals across the globe.

## Cutting-edge technology

We provide a strong product portfolio with 90+ patents, deep know-how and proprietary algorithms. The TetraGraph system is now operated by its fifth generation EMG algorithm trained to perfection by data from thousands of patients. No other company in the field of neuromuscular monitoring has such broad know-how, feature set and capabilities.

## Driven by innovation

Senzime's innovation roadmap and relentless pursuit of patient safety is unprecedented in the neuromuscular monitoring industry. We constantly strive to be at the forefront of technology innovation, leading the way to increased patient safety. The goal is to offer the most innovative, clinically relevant, accurate and easy-to-use monitoring solutions

## Backed by solid funding

Senzime is publicly traded on Nasdaq Stockholm main market, backed by long-term solid investors. The investors consists of a number of AA-rated institutional investors with the Crafoord family - the founders of the dialysis company Gambro now owned by Baxter International - as the main share holders.

## Your trusted partner

We share your commitment to patient safety. By partnering with Senzime, you as a healthcare provider can be assured you get access to the latest monitoring solutions and dedicated clinical support from a team of specialists who ensure seamless implementation and use.

# Leading the industry shift through a sustainable approach

## Committed to UN Global Compact

The only stand-alone neuromuscular provider committed to United Nations Global Compact, the world's largest corporate sustainability and social responsibility initiative.

## ISO 14001 environmentally certified

The only stand-alone neuromuscular monitor provider with an environmental management system certified according to ISO 14001.

Reduced climate footprint through complete control of production process

## Designed, produced and perfected in Sweden

Senzime monitors are produced with an environmental-friendly approach at our HQ in Uppsala, a leading Swedish life science hub.

The packaging of TetraGraph is 72 percent smaller, compared to industry peer

## Reduced packaging with over 50 percent

As a result of Senzimes systematic environmental work, we have reduced the packaging of our TetraGraph and TetraSens with over 50 percent.

## Awarded for diversity and equality

Top 15 at Allbright's diversity list for companies listed at Stockholm Nasdaq.

## Ensured commitment by all partners

Environmental sustainability is part of our strategy and day-to-day operations. Through our code of conduct, we ensure we have partners who share our high standards regarding environment, social and governance.

We're the only company in our industry with a dedicated sustainability strategy, including ISO 14001 certification and a signatory to the United Nations Global Compact initiative.

Philip Siberg, CEO of Senzime
